

The Air Tightness Testing and Measurement Association Mission Statement

ATTMA is a professional association dedicated to promoting technical excellence and commercial effectiveness for air tightness testing and air leakage measurements within Dwellings and Non-dwellings buildings.

Our Objectives

1. To develop and promote Airtightness testing technical standards for demonstrating compliance with the Building Regulations.
2. To form alliances and working relationships with other associations, industry bodies and regulators with similar objectives.
3. To promote the testing and measurement industry and to support its members by extending market awareness of the technology and the members' services.
4. To undertake Research & Development, the results from which will assist with technical understanding and policy decisions.
5. To monitor and improve on the quality of testing undertaken throughout the building industry.

ATTMA is a “Special Interest Group” under the British Institute for Non-Destructive Testing (BINDT), who administer the association’s business as instructed by the Committee.
